The **California Sun Certified Energy Efficient Home** logo consists of two parts, the logo type and the surrounding sun graphic. The **California Sun Certified** is set in New Gothic Medium and **Energy Efficient Home** is set in Warnock Pro Semibold. The type treatment should not be re-created, as all weight and letter spacing must remain consistent in all uses and applications. The sun graphic is used to reinforce solar branding.

In order to reinforce the branding standard of **California Sun Certified Energy Efficient Home**, the logo must be used correctly, which is stated in the following guidelines.

**color**

The bright, energetic colors in the **California Sun Certified Energy Efficient Home** logo were selected to demonstrate an energetic and sunny image that supports the **California Sun Certified Energy Efficient Home** solar message and to ensure readability. Always reproduce the logo in its original colors. Four color process and RGB builds are also identified.

*Note: Make sure to use the appropriate format of the logo for its application. For example, if the logo is being used on items that require simple line work, make sure to choose the file that has no colors or screens in it.*

**Orange pms 144**

C: 0  M: 48  Y: 100  K: 0  R: 248  G: 152  B: 29

**Golden Yellow pms 123**

C: 0  M: 24  Y: 94  K: 0  R: 255  G: 196  B: 37

**Blue pms 299**

C: 85  M: 19  Y: 0  K: 0  R: 0  G: 157  B: 220
clear space
A clear space void of any imagery and typography must always surround the logo. As shown in the diagrams below, the clear space (denoted with an ‘x’) is always proportional to the height of the two lines of type reading California Sun Certified Energy Efficient Home.

size
To ensure legibility, the California Sun Certified Energy Efficient Home logo should be reproduced in print no smaller than .75 of an inch tall. The logo should be reproduced on the web no smaller than 75 pixels. In any use, take care to ensure that the integrity and legibility of the logo are preserved.

use
To preserve its integrity and legibility, there are certain rules to follow when using the California Sun Certified Energy Efficient Home logo.

- Do not place the logo on complex backgrounds that impair readability or conflict with the logo colors.
- Do not place the logo within a sentence or paragraph.
- Do not stretch or warp the logo.
- Do not modify the color or proportions of the logo.
alternative application

The one color versions of the California Sun Certified Energy Efficient Home logo should only be used when the final product is printed with a limited number of colors. The one color should only be produced in the approved PMS colors. If one of these colors is not an option, the black or white version should be used. If the logo is to be placed on a dark background, the yellow or white version should be used. If a light background is being used, the blue, orange, or black logo should be used. It is important to use the version that provides the greatest contrast for better readability. This is the alternative use of the logo.

black & white application

The black and white version should ONLY be used when color versions are not possible. The logo must be consistent to represent the California Sun Certified Energy Efficient Home branding.
acceptable usage

Logo is clear and legible.

unacceptable usage

Photo behind logo is very busy and distracting. Color of logo gets lost in background.

Logo is clear and legible.

Blue color of logo gets lost in background color.

Logo is clear and legible.

Color of logo gets lost in background color. Not enough clear space, logo is too close to the edge.
