Developing a Portfolio of Advanced Efficiency Solutions: Technologies and Approaches for More Affordable and Comfortable Buildings

The purpose of this addendum is to make the following revisions to the Solicitation Manual and Pre-Bid Questions/Answers for PON-13-301:

**Solicitation Manual (Program Opportunity Notice)**

1. Chapter I, Section F (Key Activities Schedule), page 8: Extend dates as follows:
   - Deadline to Submit Abstracts: June 13, 2014
   - Posting of Stage 1 Results: July 18, 2014
   - Deadline to Submit Stage Two Proposals: August 22, 2014

**PON-13-301 Pre-Bid Questions/Answers**

1. Question 168: Revise answer to clarify that support letters may come from subcontractors and any other project stakeholders.

**Note**: The original response to question 168 conflicted with the solicitation manual. If this addendum affects a Stage 1 Abstract that has already been submitted, applicants may submit a complete or partial revised Abstract by June 13, 2014, 3:00 p.m. The revision must identify the language and corresponding page numbers that must be replaced. Please submit the original and nine copies of each revised page or Abstract, including one copy with original signatures.

As the conflict between question 168 and the solicitation manual may have prevented applicants from applying, new Abstracts will also be accepted until June 13, 2014, 3:00 p.m.
