Subject: Coordination of Mitigation for BrightSource Solar Development

Dear Mr. Hunting:

This letter confirms agreement between the Bureau of Land Management (BLM) and the California Department of Fish and Game (DFG) regarding mitigation measures for the BrightSource Energy solar development project near Ivanpah, California (CACA-48668).

The current per acre mitigation fee established by the California State Director should be updated to reflect current land value and recent purchase prices. BLM will work with DFG and the applicant to establish the updated value.

The BLM mitigation ratio of 1 to 1 will be applied within the mitigation ratio that DFG has determined for the BrightSource project. The BLM acknowledges and accepts that BLM’s mitigation requirement will primarily fund implementation of recovery actions jointly recommended by BLM, DFG and the United States Fish and Wildlife Service (FWS) biologists, while the remaining mitigation requirement will fund land acquisition.

Deed restriction language approved by the Department of Justice will be included in the deeds for lands acquired for project mitigation and donated to BLM for long-term management.

For any land enhancement actions or recovery actions implemented on existing BLM-owned lands as part of mitigation for this project, BLM will develop a Memorandum of Understanding with DFG containing provisions for notification of any proposed projects affecting those lands. The BLM agrees that future projects that may degrade or diminish the recovery value of this mitigation action will be compensated at a higher rate.

Thank you and your staff for your effort in working with the BLM and the FWS in determining a solution that meets all of our agencies’ goals and missions. We look forward to continuing our collaborative efforts to promote renewable energy while protecting a healthy and functional desert ecosystem.

Sincerely,

James W. Abbott
