On February 9, 2009, the Sacramento Power Authority (SPA) filed a petition with the California Energy Commission requesting to modify the Campbell Cogeneration Project. The 172 megawatt project was certified by the Energy Commission in November 30, 1994, and began commercial operation in 1997. The facility is located in the city of Sacramento, in Sacramento County.

DESCRIPTION OF PROPOSED MODIFICATION
The modification(s) proposed in the petition would add air quality Conditions of Certification (COCs) providing for a new commissioning period necessitated by the replacement of the gas turbine/duct burner control system; and modifying existing COCs AQ-10, 11, 15, 19, and 31.

ENERGY COMMISSION REVIEW PROCEDURES
The purpose of the Energy Commission's review process is to assess the impacts of this proposal on environmental quality, public health and safety. The review process includes an evaluation of the consistency of the proposed changes with the Energy Commission's Decision and if the project, as modified, will remain in compliance with applicable laws, ordinances, regulations, and standards (Title 20, Calif. Code of Regulations, section 1769). Energy Commission staff is currently analyzing the request and will publish an analysis in the near future. A public hearing for the purpose of approving or denying the amendment proposal will subsequently be held at a regularly scheduled Energy Commission business meeting.

This Notice of Receipt is being mailed to interested parties and property owners adjacent to the project site who may want to participate in the amendment process.

The petition is available on the Energy Commission's website at http://www.energy.ca.gov/sitingcases_pre-1999/index.html. The staff analysis (when published), will also be posted on the website. If you would like to receive a hard copy of the petition and/or staff's analysis, please complete the enclosed Information Request Form and return it to the address shown.
